

LESSON 1 - ASSIGNMENT

1. In 3 sentences, explain the difference between digital and film photography.
2. Briefly explain any experience or prior knowledge which you have that is relevant to digital photography.
 - Tell us about any equipment you have used or seen.
 - Tell us about anything you have read.
 - Tell us about any courses which you might have studied.
3. What is the scope and what are the likely future applications of digital photography in your locality or for you personally?
Explain your own personal impressions of the subject based upon the set task in this lesson, together with any other experiences you have had in the past.
4. Why does RGB need to be converted to CMYK for printing?
5. Draw up a table with two columns, one headed digital and the other analogue and fill in as much information as you can to compare the two forms of photography, one with the other, based on your current knowledge. Allow extra space to modify or add to points as your knowledge increases. Make comparisons in terms of any characteristics you have discovered so far (eg. cost of initial equipment, cost of using equipment, speed of use, quality of image, ease of preservation, etc).
