

ASSOCIATE DIPLOMA IN BOTANICAL SCIENCE

[VSC017]

- Full tutor support from highly qualified and experienced plant scientists.
- Recognised member IARC, UK Registered Learning Provider, UK PRN10000112.
- A practical, diverse, self-paced online learning journey.

COURSE CONTENT

1500 hours of study & 15 modules, including both online desk work and away from home field work – but all achievable close to where you live and at your own convenience.

Modules may include any of the following:

- Botany 1 & II
- Biochemistry I, II & III, Environmental Chemistry
- Plant Ecology, Plant Pathology, Plant Conservation
- Plant Breeding, Tissue Culture, Greenhouse Management
- Cell Biology, Microbiology, Genetics, Genetic Applications, Climate Science
- Research Project, Workshops, Environmental Assessment, Workplace Project
- Any other module with a strong relevance to plant science.

QUALIFICATIONS ENTRY & EXIT POINTS

Course Progress Achieved	Corresponding Credential Earned*
6 approved core modules	Certificate in Botanical Science
9 approved core modules	Advanced Cert. in Botanical Science
5 core modules and 5 elective modules	Foundation Diploma in Applied Botany
15 core modules	Associate Diploma in Botanical Science
7 core modules + 2 Industry modules + 14 electives	Diploma in Botanical Science
7 core modules + 2 Industry modules + 18 electives	Advanced Diploma Botanical Science

*Qualifications are not cumulative; you will only receive the specific credential for your final exit point.

Your 'learning package' will include:

- Course notes.
- Self-assessment quizzes.
- Assignment feedback.
- Direct help when needed from a plant scientist – just email, phone or log on to chat to connect with them.
- Many courses incorporate practical work e.g. research, interviews, field work exercises, Problem Based Learning projects, and more.
- Assessments consider all interactions with a student including submitted assignments, sit down exams and dialogue verbally or in writing.

WHY STUDY THIS?

- Work in environmental management, consulting, or research.
- Upgrade your career to a technician level in horticulture, farming or other plant based industries.
